DETAILED ACTION

Response to Amendment

The amendment filed on 8/9/2006 has been entered.

Allowable Subject Matter

Claims 2-26 are allowed. The following is an examiner's statement of reasons for allowance.

Regarding independent claim 11, the prior art of record does not teach or suggest the invention of an electron tube having two different auxiliary linear members being disposed at different heights to interpose primary linear member which is installed in the vessel of the tube, wherein the two end portions of the auxiliary members are fixed to two different fixing members, along with other claimed limitations. Claims 2-7, 9, 10, 12, and 13 are allowed due to claim dependency.

Regarding independent claim 14, the prior art of record does not teach or suggest the invention of an electron tube having two different auxiliary linear members being disposed at different heights to interpose primary linear member which is installed in the vessel of the tube, wherein fixing members are formed at a single substrate being a part of the vessel, along with other claimed limitations. Claims 15-23 are allowed due to claim dependency.

Regarding independent claim 8, the prior art of record neither teaches nor suggests an electron tube having two different auxiliary linear members disposed at different heights are disposed alternatively along the length direction of primary linear members, along with other claim limitations. Claims 24-26 are allowed due to their claim dependency.

Art Unit: 2879

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
